Tematické zaměření: central research objectives in the following areas:

- methodological foundation of interdisciplinary research
- studies in the field of history of philosophy, especially ancient and medieval philosophy and German idealism, in comparison with history of science, art and religion
- ethics and bioethics in connection to biomedical and biotechnical sciences, but also other scientific and non-scientific, cultural and religious perspectives
- philosophy of education in relation to pedagogy and psychology (especially in the new field of philosophy for children)
- practical philosophy (social and political philosophy) in close connection to sociology and political science
- investigations into logic and philosophy of language in connection with linguistics and mathematics
- the relationship of cognitive science and philosophy
- philosophy of art in context of cultural studies and in comparison to sociology and anthropology of art
